FUTURYNTIX

UK LTD

AI-Native Solutions.

Real-World Impact.

Intelligent, scalable, and secure software that transforms industries — built for regulated and complex enterprise markets.

Aman Jain · Founder & Director, Futuryntix UK Ltd

aman.jain@futuryntix.com· ww.futuryntix.ai

Building AI-native products for regulated, complex enterprise markets.

Futuryntix UK Ltd is a UK-incorporated AI product company building vertical platforms for industries where regulation, compliance, and operational depth create defensible moats. Bootstrapped, operator-led, deployed across multiple jurisdictions.

VERTICAL AI

Built for regulated markets

Healthcare, compliance, supply chain — industries where AI alone isn't enough. Regulatory complexity is the moat.

EXECUTION

Operator-led, bootstrapped

20+ years enterprise software depth. Products live with institutional credentials. Real customers, real deployments.

MULTI-JURISDICTION

Architecture-first

Multi-tenant SaaS with regional data residency. Same platform serves UK, India, and GCC tenants — compliance built in.

aman.jain@futuryntix.com· futuryntix.ai

Vertical AI for regulated markets.

Boring AI by design — built for mandatory compliance, not optional adoption.

01

Compliance is mandatory

Regulated industries cannot opt out of compliance. The buyer is forced to procure — recurring revenue is structural, not earned. Investors fund this.

02

AI alone is not enough

Regulatory knowledge, integration depth, and operational rigour are the real moats. Wrapping GPT around a problem doesn't ship in healthcare or compliance.

03

Greenfield, globally

Emerging regulatory regimes have almost no purpose-built AI tech. The platforms architected now compound for the next decade.

The category compounds. The architecture is the moat. The execution is the differentiator.

aman.jain@futuryntix.com· futuryntix.ai

Six products. One thesis. Built and shipped.

Each product is AI-native in a regulated or operationally complex market. Architecture and engineering are shared across the portfolio.

PharmSageAI

HEALTHCARE

Intelligent healthcare workflows for better care and decisions.

ScoutAI

WAREHOUSING

Smart warehousing solutions for real-time visibility and efficiency.

Chargytix

TRANSPORTATION

AI-driven transportation intelligence for a smarter tomorrow.

Orbizo

ERP FOR MSME

All-in-one ERP built for MSMEs to manage, grow and scale.

Yumeetly

AI MEETING ASSISTANT

AI-powered meeting assistant for smarter notes and follow-ups.

CircleIQ

RECYCLING & EPR

AI-powered compliance and lifecycle management for a circular future.

aman.jain@futuryntix.com· futuryntix.ai

Two flagship products leading the portfolio.

Real institutional credentials. Live deployments. Multi-jurisdictional architecture.

PharmSageAI

HEALTHCARE

Intelligent healthcare workflows for community.

- Institutional credentials with national healthcare body
- Multi-API integration with primary care infrastructure
- Clinical Director with 25+ years frontline practice
- Multi-tenant SaaS with regional data residency
- Going live commercially with launch pharmacy network

CircleIQ

COMPLIANCE · CIRCULAR ECONOMY

AI-native compliance for regulated producer markets.

- AI-native compliance and reporting engine
- Multi-tenant, multi-jurisdiction architecture
- Regional data residency across deployment regions
- Active pilot conversations across producer market
- Replicable into adjacent emerging regulatory regimes

aman.jain@futuryntix.com· futuryntix.ai

Operator-led, bootstrapped, multi-jurisdictional.

Built by a founder with 20+ years of enterprise software depth. Architected for scale from day one.

20+
Years enterprise software experience

6
AI-native products in portfolio

2
Flagship products live or near-launch

Multi-
Region architecture (UK · India · GCC)

ENTERPRISE DEPTH

Built by an enterprise software veteran

Two decades shipping at SAP, IBM, Accenture, Capgemini, NTT DATA. Published SAP Press author. Brings enterprise sales, procurement, and integration discipline to AI product building.

ARCHITECTURE-FIRST

Multi-region, multi-tenant from day one

Regional data residency designed in. AWS Organisations structure across deployment regions. Compliance and jurisdictional governance built into platform foundations.

DUAL-ENTITY STRUCTURE

UK parent + India operating subsidiary

Futuryntix UK Ltd holds IP and global brand. India subsidiary handles regional deployment with DPIIT recognition. GCC entity scoping for jurisdictional expansion.

ECOSYSTEM ALIGNED

Partner with the cloud and platform leaders

Aligned with SAP, AWS, Google Cloud, and Microsoft ecosystems. Products built natively on enterprise-grade infrastructure, not bolted on after.

aman.jain@futuryntix.com· futuryntix.ai

Built on enterprise-grade foundations.

Aligned with the cloud and platform leaders. Our products are AI-native on enterprise-class infrastructure — not bolted on top.

SAP

Open Ecosystem Partner

Native integration with SAP BTP, TM, EWM, and S/4HANA. Enterprise extension pattern.

Google

Google Cloud Partner

Cloud infrastructure, AI/ML services, and global region availability for regulated deployments.

AWS

AWS Partner

Multi-region deployment with jurisdictional data residency. Core production infrastructure.

Microsoft

AI Cloud Partner

Azure and Microsoft AI ecosystem for enterprise hybrid deployments and customer alignment.

Our position: AI-native products on enterprise-grade clouds. Not consumer AI experiments — production platforms with audit trails, compliance posture, and regional governance.

aman.jain@futuryntix.com· futuryntix.ai

Multi-region by design.

Same platform. Multiple jurisdictions. Compliance and data residency built into the foundations — not added later.

MULTI-TENANT SAAS

Schema-isolated tenants

Each customer is isolated at the schema level. Tenant-aware routing, role-based access control, and per-tenant configuration.

MULTI-REGION DATA

Jurisdiction-aware residency

Data lives in the region of the customer's jurisdiction. UK, India, GCC regions — same code, different data planes.

AI-NATIVE CORE

AI is the engine, not a feature

Vector search, RAG over regulatory knowledge, and structured AI workflows are core. Not retrofitted onto legacy software.

ENTERPRISE-GRADE

Encrypted, audited, observable

TLS 1.3 in transit, AES-256 at rest, audit trails on every PII access, CloudWatch + Sentry observability across regions.

Built once. Deployed wherever regulation demands. Same intelligence layer across jurisdictions.

aman.jain@futuryntix.com· futuryntix.ai

Aman Jain

Founder & Director, Futuryntix UK Ltd

20+ years building enterprise software for global Fortune 500 customers — at SAP, IBM, Accenture, Capgemini, and NTT DATA. Deep specialty in enterprise supply chain, logistics, and ERP platforms. Published SAP Press author.

Founded Futuryntix UK Ltd in 2024 to pursue a different thesis — that AI applied to regulated, complex enterprise markets creates more defensible, recurring, and structurally valuable businesses than horizontal AI tooling.

Based between the UK (Derby) and India (Noida). Operating across UK, India, and GCC markets.

CREDENTIALS

- 20+ years enterprise software (SAP, IBM, Accenture, Capgemini, NTT DATA)
- Published SAP Press author
- Deep specialist in supply chain, logistics, EWM, TM, S/4HANA
- Founder & Director, Futuryntix UK Ltd (UK-incorporated)
- Dual operating presence: UK + India (DPIIT-recognised subsidiary)
- Active engagement: AI Summit London · RAISE Paris · LEAP Riyadh · Web Summit Qatar

aman.jain@futuryntix.com· futuryntix.ai

Three forces make this the moment.

01

AI is finally enterprise-grade

Foundation models are deterministic enough, fast enough, and cheap enough to power regulated workflows. The technical risk that blocked AI in healthcare, compliance, and supply chain is collapsing.

02

Regulation is expanding everywhere

Healthcare, sustainability, producer responsibility, data protection — regulations are multiplying across jurisdictions. Every regulation creates a forced buyer and a recurring revenue line.

03

The greenfield window is open

Existing software in regulated emerging markets is largely spreadsheets and legacy systems. Purpose-built AI-native platforms architected now will compound for the next decade.

Those who insert this layer now compound the advantage. Those who wait, pay it.

aman.jain@futuryntix.com· futuryntix.ai

On the ground where it matters.

Active engagement across the AI, investor, and regulated-industry ecosystems globally.

JUN 2026

London

AI Summit London + Tech Week

UK ecosystem engagement, NHS-adjacent conversations, European tech presence.

JUL 2026

Paris

RAISE Summit

European AI investor capital, corporate venture, regulated-markets thesis.

AUG 2026

Riyadh

LEAP + DeepFest

GCC sovereign capital, Vision 2030 aligned customers, regional partnership.

FEB 2027

Doha

Web Summit Qatar

Continued GCC engagement, family office capital, regional buyer ecosystem.

Founder-led engagement across four continents in 12 months. Customer pipeline, investor conversations, and partnership development happen in person.

aman.jain@futuryntix.com· futuryntix.ai

From product to platform.

18 months of bootstrapped execution — built, validated, and live with credible institutional credentials.

2024

Foundation

- Futuryntix UK Ltd incorporated
- Indian subsidiary established
- Architecture and platform design

2025

Build

- Six AI-native products built
- Multi-region infrastructure live
- Institutional credentials secured

2026

Launch

- Flagship products go commercial
- First paying customers
- European + GCC market entry

2027

Scale

- Multi-jurisdiction expansion
- Capital partner engagement
- Platform extension across portfolio

aman.jain@futuryntix.com· futuryntix.ai

Looking to connect with the right people.

Futuryntix is open to substantive conversations across four categories.

CUSTOMERS

Healthcare, compliance, supply chain operators

Looking for design partners and early customers in regulated industries — particularly those facing mandatory compliance pressure and looking for AI-native solutions.

INVESTORS

Seed-stage capital, family offices, corporate venture

Conversations 6-12 months ahead of formal raise. Specifically: vertical AI thesis investors, healthcare-focused funds, GCC family offices with Vision 2030 alignment.

PARTNERS

System integrators, channel partners, regulators

Channel partnerships with established players in target geographies. Integration partnerships with complementary platforms. Engagement with regulatory bodies and industry councils.

TALENT

Operators and senior engineers

Senior engineering talent (Node/TypeScript, AI/ML, PostgreSQL, multi-region SaaS). Operators with experience in regulated markets. Founders and advisors with relevant networks.

aman.jain@futuryntix.com· futuryntix.ai

Building the AI platform layer for regulated markets.

Open to substantive conversations with customers, investors, partners, and talent.
